PARTNER VIOLENCE AFFECTS YOUR REPRODUCTIVE HEALTH

WE TREAT WOMEN RIGHT

- ∞ Partner violence results in many women not protecting themselves against unwanted pregnancies and not using efficient contraceptive methods.
- ∞ Partner violence results in many women not seeking support from their family when facing an unwanted pregnancy.
- ∞ Partner violence makes it more difficult for women to choose voluntary abortion, especially when they are not in control of the family budget and they have no financial means.
- ∞ Partner violence isolates women and destroys their trust in other people.
